

# I WILL FOLLOW JESUS!

# MAGNET EXPERIMENTS!

Use magnets to learn about following! Allow you kids to explore how the magnets pull and attract other objects then use this activity to explore the concept of discipleship!

## SUPPLIES:

- Magnets
- Metal objects
- Non-metal objects

## EXPERIMENT:

1. Prepare magnets along with metal and non-metal objects on a table, demonstrate the properties of the magnet and explore!
2. See if you can pass on the magnet charge from the magnet to another metal object (drag it across the magnet in the same direction several times). Can you magnetize the second metal object so it also attracts things?

## QUESTIONS:

1. Magnets attract metal because they have a 'magnetic field,' but what makes a person attract another? Why might one person follow another?
2. Why do we follow Jesus?
3. A magnet can pass on its magnetic charge to another piece of metal, how might this remind us of discipleship?

"I give you a new command. Love one another. You must love one another, just as I have loved you. If you love one another, everyone will know you are my disciples."

**John 13:34-35 (NIRV)**
